**2025
Shrimp
Pathology
Short Course**

What is the short course?

Lectures and hands-on training in diagnostic methods for diseases relevant to marine shrimp aquaculture, including:

- **Histopathology** (H&E, *in-situ* Hybridization)
- **PCR** (Conventional & Real-Time PCR)
- **Microbiology** and bioassays

Where is the short course?

The University of Arizona Aquaculture Pathology Lab is located in Southern Arizona in the middle of the sunny Sonoran Desert! Tucson is surrounded by beautiful mountains and is located about 220 miles away from the ocean, making it the ideal location for shrimp disease diagnosis and research.
